

# Campground Connect

*Offering Campers Wireless Fiber to the Tent*

## **Once upon a time...**

Deep in the wilderness, there existed a campground called "Wild Haven," a sanctuary for those seeking solace in nature's embrace. The campground's owner, believed in blending the tranquility of the great outdoors with the conveniences of modern technology. She deployed a private LTE network throughout the campground, unearthing a world of incredible benefits.

As the sun set over Wild Haven, families gathered around crackling campfires. With the private LTE network, they effortlessly captured and shared these cherished moments with loved ones in real time. Parents watched their children's laughter-filled faces, bridging the distance between them. Connectivity became a thread that wove families closer together, even amidst the vast wilderness.

Wild Haven's private LTE network seamlessly integrated technology with the raw beauty of the outdoors. Campers could now use their smartphones as interactive guides, planning digital trail maps and identifying local wildlife with ease. The private LTE network struck a harmonious balance and elevated the camping experience, adding a touch of convenience without overshadowing the majesty of nature.

Easily connect campers to the internet with the ease-of-use they expect from modern infrastructure.

Bring high-speed, reliable internet access to a campground near you. Expand the network to indoor, on-site facilities, restaurants, and stores.

Get started with Baicells, today.

**Baicells**

**Base Stations** - Install an LTE base station to cover the campground with wireless signal that can easily cut through tree coverage and deliver reliable connectivity.

**CPEs** - Rent out indoor CPEs to campers. They can simply plug in the device and it will automatically connect to the LTE network and output an easily accessible Wi-Fi signal.
